

[SIMIC](#) was invited to participate on July 10 in the Piedmont Multistakeholder Forum organized by A2A, at the Chivasso (TO) thermoelectric power plant, inherent to the #ESG compliance of suppliers and companies working with A2A and the protection of the biodiversity of territories.

☞ The appointment is part of the structured program of listening and dialogue with local stakeholders that A2A carries out as a Life Company - a company that takes care of the lives of the people and territories in which it is present, in order to create shared and lasting value, which is essential to achieve sustainability goals at the heart of A2A's strategic plan.

☞ SIMIC is a long-standing supplier of A2A and has been operating since 2016 for maintenance works and installations of industrial plants at A2A sites in different Italian regions.

☞ Speakers for SIMIC were Renato Ginola, Head of the Construction Sites Division, and [Alessandro Chiari](#), Head of the Safety & Environment Office and #ESG contact person, who had the opportunity to highlight how SIMIC is also attentive to #ESG issues and is embarking on a path of continuous improvement in particular to identify collective actions that accelerate the sustainable transition and increase awareness and sensitivity of local communities on biodiversity and climate change.
