Hospital Integrated Information System

Shras ITS flagship Healthcare Information System (HIS) product, **implemented across more than 300 plus Hospitals globally.** With the Dynamic changes in both Business and Technology, our HIS product not only limited to address the current but also scale to Hospital's future requirements. Apart from many other features, **our product using Information and Technology reduces the turnaround time of the patients and optimizes** it based on the workflow process of the hospital.

HIS Product is fully compliant with various International Health Regulators and Governing bodies globally which includes **CBAHI, JCIA, HIMSS, HL7, ICD 10.** HIS Product has strong flexible integration interfaces with our own PACS or 3rd Party, Insurance Companies, ERP which are key factors for our customers. It is already integrated with many ERP and Backend systems like SAP, Oracle, MS, Siege, Focus, Tally to name a few. We have integrated with almost more than 200 different brands of Medical Equipment's used by various departments of the hospitals.

SHRAS Group Healthcare Company constitutes of professional Engineers having decades of experience in Health Industry covering various regions Globally. We provide End to End solutions to Healthcare units right from the **CONCEPTION, INCEPTION to REALIZATION.**

Shras ITS believes in long term partnership with our customers by providing Value Added Services and Solutions. Shras ITS has expertise in providing solutions which includes Bar Code/RFID, Messaging, Q- Management which are required by all hospitals.

FIELD SERVICE MANAGEMENT

FIELD SERVICE MANAGEMENT

SHRAS ITS FSM offers both On-premises and Cloud deployment. SHRAS ITS FSM Solution offers various advantages, such as scalability, flexibility in capacity, enhanced collaboration, and cost efficiency. The implementation of cloud-based field service management solution facilitates SMEs and large enterprises to focus on their core competencies, rather than IT processes. With the help of the cloud-based field service management solutions, organizations can gain a 360-degree view of the service life cycle - from scheduling and dispatching to service contracts management, and customer management. Moreover, cloud-based field service management solutions offer a centralized way to integrate the system and its components with web and mobile applications and helps organizations to boost the performance of their field Team.

COE & Development Center

Onsite

Offsite

Offshore

Our Partners

SHRAS IT is an approved partner of some of the major internationally renowned Tech. Companies in the world such as:

- SAP
- Microsoft
- Oracle

We have the technical support of all our partners around the world for implementation and deployment of any of the applications with all our three partners. Additionally we have an in house team of consultants with expertise and trained in the products, services and solutions offered by our partners:

- Strong Consultant force possessing 4+ years of ERP(SAP,MS, Oracle) experience
- Most Consultants are certified in respective domains.
- Good Industry experience.
- Implementation, Support & Rollouts experience.
- Enormous experience working in SAP, Microsoft and Oracle Products
- Good Project Management experience.
- Experience of working multiple countries in multi culture environment

Delivery Models

We offer multiple delivery models to our clients:

- Onsite Delivery Model
- Offsite Delivery Model
- Onshore Delivery Model
- Offshore Delivery Model

Onshore Delivery Model: Based on our client's requirements, we study and analyze the requirements and deploy experienced technical experts onshore at the client's location in building their business capabilities, test and implement robust, small, medium and large applications at the client's location and continuously follow up till the operations are completely streamlined.

Offshore Delivery Model: We leverage our in house state of the art infrastructure and deploy a dedicated team of professionals in building the required applications and implement them remotely in line and consistent with the outlined requirements with a thorough and comprehensive established communication model with the assigned team of our clients.

Shras IT Solutions Pvt. Ltd

SHRAS IT Solutions maintains high level standards with an integrated approach adopting the state of the art Agile and waterfall methodologies in building large scale technology products, services and solutions with international standards maintaining and quality assurance and testing methods.

SHRAS Resources Mobilization Strengths:

- Dedicated Project Manager
- SRS will provide a Project Manager during the complete implementation cycle of the project
- Mobilization/De -Mobilization
- Certified Consultants
- Experience Level

Quality Assurance & Testing

SHRAS IT quality assurance and testing employs a zero defect management methodology, with a safe, secure and robust approach for both the Onshore and Offshore delivery models. Our quality assurance team of professionals works closely with the technical architects and consultants in testing the applications meticulously to the minute detail in ensuring the implementation of solutions with total quality management systems.

SLA Methodology & Approach

After the implementation, delivery and sign off of the project, our enormously experienced team of maintenance engineers document the entire process of the solution so that the operations of our client's business process works seamlessly without any hindrance.

We maintain and implement global standards ticket raising, bug priority, response and resolution time strictly adhered to in consonance with the requirements.

Key Differentiator - How different we are

- Pro-active rather than reactive
- Be able to "foresee" problems before they occur - 80%
- Determine Focal Points during Transition
- Increase "First Touch" Resolution
- Reduce Call Volume through Continuous Improvement
- Design and Implement Metrics Monitoring for achieving targets
- Process Dependent rather than Resource Dependent

How are we able to achieve this?

- Implement Root Cause Analysis (RCA)
- Identify and Implement Metrics based monitoring
- Periodic Comparison Charts to show performance improvement
- Strictly follow Guidelines and Implement Process control Mechanisms
- Strictly enforce Accountability

Our Credentials

- Major Clients in KSA, Kuwait, Dubai, Qatar & India
- Various IT Projects executed in India
- CEO and development center
- Branches across 4 locations and expanding rapidly

Corporate Social Responsibility (CSR Initiatives)

As a major international company with presence across the world delivering cutting edge web services, solutions and products to fortune 500 companies, we are conscious of our social responsibility towards the society.

As a part of our social endeavor, we are committed to contribute to the society in our own small way; we have chose to help under privileged and orphaned children with high quality education, which they are sadly deprived of.

And as a part of this initiative, we are closely working with numerous schools in India reaching out to hundreds of schools and bringing about a qualitative change in their lives by offering schools with computer systems, and other facilities in the schools so that the deprived students learn the advanced education and bring them into the social mainstream.

Our employees at our global delivery center in Hyderabad also visit the schools on weekends to impart them training in English, basic computer skills and personality development.
