Introducing AVEVA

AVEVA infuses industrial software with intelligence to empower people to shape a sustainable future. We work with our customers and harness the power of our ecosystem to deliver operational agility and empower human expertise. Our solutions advance engineering and operations with performance intelligence. From water and energy to food and infrastructure, we inspire insights that transform opportunity into sustainable business value. We combine unparalleled intelligence with collaborative innovation to enable people and industries to thrive.

**By the numbers:**

- FTSE100 UK Company
- 50+ years of innovation
- 130+ patents
- 20,000 global customers
- 5,500 partners
- 6,500 talented people
- FY19–20: £833.8m revenue, 26% adjusted EBIT margin

We are proud of our proven track record in pioneering innovation in the engineering, operations and performance of industrial assets in diverse sectors, across the world. Our foundation over 50 years ago stemmed from a combined initiative of the UK Government and the University of Cambridge, with a mission to improve how technologies can empower industries to innovate and achieve greater benefits for the people and communities they serve.

Over the past fifty years, we have remained true to our founding principles, leading in research, pioneering new thinking, and working in partnership with leading companies to solve the world's most complex engineering, operations and performance challenges using state-of-the-art industrial software.

## Deep customer relationships drive our innovations

Chemicals

**650+** customer sites

Food, Beverage and CPG

**3,000+** customers

Infrastructure

**4,000+** customers

Marine

The world's **12** largest shipyards

Mining

**50+** mining sites

Energy

**550+** refineries

**900,000** miles of pipeline

Power

**3,000+** power plants

**750,000+** MW of electricity monitored

Manufacturing

**5,000+** manufacturing sites  
and smart factories

Water and Wastewater

**1,600+** water customers

---

## What we do

Engineer smarter, operate better, and achieve more with Performance Intelligence. Our comprehensive software portfolio connects the power of information and artificial intelligence with human insight, empowering the people behind every day essential processes to make precise decisions and realize sustainable growth.

Simplify design processes, optimize production, reduce energy and maximize performance with solutions that predict outcomes and provide guidance freeing your people to act faster.

## Deliver capital projects to operations sustainably, on time and on budget

Elevate your capital projects with Performance Intelligence that enables you to save resources, track project status, increase efficiency and lower costs. Lay the digital foundation for your project teams to simplify industrial asset design processes, control project execution and empower your operators to deliver sustainable facilities.

## Improve operational efficiency, agility, reliability and sustainability

From operations control to value chain optimization and asset performance, AVEVA's Performance Intelligence-driven Operations solutions empower the connected worker like never before. By breaking down silos and increasing efficiency, our solutions reduce value leaks, minimize unscheduled downtime and use Performance Intelligence-driven visualization to increase operational agility and maximize performance.

## Connect the power of information and artificial intelligence with human insight

Empower your people with new levels of Performance Intelligence. Our solutions deliver industrial information management with integrated analytics directly to your experts managing capital and operating expenses, mitigating risk and driving innovation. Give your people the information they need, in the right format, at the right time, to unlock new levels of performance.

---

## Our global customers

AVEVA's customers include some of the world's leading companies.

---

## Helping people to shape the future

There are no limits to how technology can empower people to achieve more, realizing a sustainable future for industries. We continue to evolve our business in step with our customers, because our success is rooted in empowering people to seize the possibilities of a sustainable future, using world-beating industrial software.

Our success is rooted in our understanding of the day-to-day realities and challenges our customers face in diverse sectors. Working in collaboration, we create and pioneer solutions that power the world and drive a sustainable, successful future for the world's most complex businesses.
