PARKSMART
SMART PARKING GUIDANCE SOLUTION

Conure ParkSmart is an advanced smart parking guidance solution designed to help drivers quickly locate parking and minimize frustration. Utilizing a network of smart sensors and IoT gateways, ParkSmart connects seamlessly to the Conure cloud, delivering real-time parking availability data. Accessible through our mobile app, web portal, or digital signage, ParkSmart enhances ROI, streamlines operations, and improves the parking experience for facilities and customers alike

Key Features

Real- Time Parking Availability

With the aid of advanced in-ground radar sensors, ParkSmart can monitor parking spaces and display real-time occupancy status. These sensors transmit data to the Conure cloud platform, allowing users to access real-time parking information on various devices.

Contactless Payment

ParkSmart offers drivers convenient cashless payment options. They can pay for their parking spots using mobile apps and other payment gateways, such as ParkMobile and Flowbird, which are integrated into the ParkSmart application.

Centralized Data Management

Conure ParkSmart features centralized cloud-based data management, analytics, and control options. This smart parking guidance solution operates 24/7 with high accuracy, efficiently monitoring parking spaces without human error.

Navigation and Guidance

With ParkSmart's navigation and guidance feature, you can quickly find the nearest available parking spot. ParkSmart integrates with popular navigation apps and GPS services, making it easier to locate parking options and navigate to your destination.

Value Realized

- Customized Analytic Dashboard
- Accurate Parking Occupancy Information
- Reduced Traffic Congestion
- Enhanced User Experience
- Eco- Friendly Impact
