

Revolutionizing Parking, Empowering Infrastructure

From smart parking guidance to intelligent building management solutions, we strive to keep your organization running as securely and efficiently as possible.

Conure is building the future of connected infrastructure and playing a vital role in developing smart cities. A leader in smart networks and data-focused applications, we tailor our solutions to address the evolving needs to monitor, measure, enforce, count, track and monitor critical information to effectively manage manned and unmanned environments. Conure's pioneering hybrid approach to solving problems presented by old and new infrastructure applies decades of Radio Frequency expertise to deliver a seamlessly connected Internet of Things experience.

Our desktop and handheld applications empower users to actively manage sensor enhanced environments under a broad spectrum of conditions, in real-time. Conure offers a highly versatile end-to-end solution from design, through deployment, monitoring and maintenance. Contact us today regarding our municipal, commercial, and residential applications. The benefits are endless.

Experience Realized

Our commitment to organizations enables us to harness the power of data to enhance efficiency, safety, and quality of life, while also identifying new revenue streams.

From predictive maintenance to energy monitoring, our technological offerings create sustainable environments by maximizing efficiency and minimizing ecological footprints.

With a team of over 130 years of combined experience, our dedication to innovation enables us to successfully implement IoT and software projects across public and private sector organizations.

Solutions

Parking Guidance

- Real-Time Parking Availability
- Navigation and Guidance
- Contactless Payment
- Centralized Data Management

Permit Management

- Citation Issuance
- Access Control
- License Plate Recognition
- Payment Processing

Parking Enforcement

- Security and Surveillance
- Automatic Recognition
- User Interface and Management
- Privacy and Data Security

Building Management

- User-Friendly Dashboard
- Wide Range of Sensors
- Custom Alerts
- Data Visualization
